

ENVIROGRAF® PRODUCT 27

INTUMESCENT TRUNKING PILLOWS

All Electrical Products to comply with the revised 16th Edition of the IEE Regulations and Document B of UK Building Regulations

DESCRIPTION

Compressible intumescent pillow with tag and cord, so the pillow remains with the trunking.

USE

Use this product when cold smoke as well as fire protection is required in steel or PVC trunking passing through walls and floors. The retaining cord and lug fit inside the trunking, so if the pillow is removed the lid cannot be re-fitted without first replacing the pillow. The pillows will initially allow for 30% or less filling of cables and will then compress to allow for 50% cable fill without overheating the cables. If trunking is more than 50% full, then intumescent pads (Envirograf® Product 26) should be used.

PERFORMANCE

Tested to BS476 Part 22 (1987), achieving up to 4 hours integrity. Also tested at VNE to European Standard EN1363-1 (2000).
