

ENVIROGRAF® PRODUCT 29

INTUMESCENT CABLE TRAY PILLOW

All Electrical Products to comply with the revised 16th Edition of the IEE Regulations and Document B of UK Building Regulations

DESCRIPTION

An intumescent compressible pillow for use with cable trays. In a fire, the pillow expands to fill the gap, thus stopping fire and smoke from penetrating to the other side of the opening.

USE

Where cable trays penetrate walls, floors, and ceilings, the pillow can be used to fill the opening. There is a tag and cord which can be pop rivetted to the tray to prevent loss, so that if the pillow is removed for maintenance, it can be easily refitted.

PERFORMANCE

Tested to BS476 Part 22 (1987), achieving an integrity of 181 minutes. Also tested at VNE to European Standard EN1363-1 (2000).
