

# ENVIROGRAF® PRODUCT 62

## SILICONE SEALANT

### DESCRIPTION

A flexible silicone sealant which, on curing, is like rubber in consistency. A food-safe version is available for use in food preparation areas. Also available is a self-adhesive red silicone tape for sealing around gaps and heating flues.

### USE

For use at joints between many building elements and materials giving a water and gas tight seal. For example, in steel, brick and blockwork, concrete, ceiling, walls and partitions. Supplied in 310ml tubes, available in clear and white (grey is available while stocks last). For gaps up to 50mm wide.

### PERFORMANCE

This product was used in a number of fire resistance tests employing the general procedures and criteria of BS476 Part 22 (1987). It was used for sealing around a number of penetrations and expansion joints. Integrity ratings of up to 240 minutes were achieved.
