

ENVIROGRAF® PRODUCT 69

SURFACE-MOUNTED INTUMESCENT FIRE AND SMOKE SEALS

DESCRIPTION

This is a surface-mounted intumescent fire and smoke seal available in black, brown, red, white, and real wood veneer finishes. No routing is necessary.

USE

This product can be fitted to door frames in minutes. A 3½mm or greater gap down the closing stile and across the door head is all that is required. It fits directly over hinges with no hinge bind and no special gap is necessary on hinge side. Once fitted, the face of the seal can be painted, although the brush smoke seal must NOT be painted. If the brush is painted in error, it is easy to replace. Pins are supplied for more secure fixing of the brush seal, although the brush has a self-adhesive strip at the back.

PERFORMANCE

This product was used in a number of fire resistance tests employing the general procedures and criteria of BS476 Part 22 (1987), achieving an integrity of up to 66 minutes with an 11mm gap at the head of the door. The intumescent strips included have also been successfully tested to BS476 Part 23 (1987).

ORDERING REFERENCES :

ES/SDS for single door sets

ES/DDS for double door sets

State whether rebated or open stiles on double doors and the finish required

Packs are supplied with intumescent paper for use in lock areas and labels printed "Fire Door – Keep Shut" (See price list for full range).

If the gap at the closing stile and across the head of the door is less than 3mm, request packs containing only 30PS seals, which are only 1½mm thick.
