

ENVIROGRAF® PRODUCT 77

INTUMESCENT GLAZING STRIPS

DESCRIPTION

A 2mm thick compressible intumescent strip, coloured black, brown, grey, red, and white, with self-adhesive tape backing, supplied in 10m long rolls.

USE

Used in steel doors, wood doors, and partitioning. The strips are fitted to beads each side of the glazing. Although the seal is 2mm thick, it will compress to ½mm and this will not affect its performance.

PERFORMANCE

This product was used in a number of fire resistance tests employing the general procedures and criteria of BS476 Part 22 (1987). An integrity of 45 minutes (10mm thick hardwood or 15mm thick softwood) and up to 65 minutes (20mm wide hardwood) was achieved.
